With a
QUALITY AIR BREATHING SYSTEM
by
MARTECH SERVICES

C O M P A N Y

These systems are designed to provide OSHA Grade D, Breathable Air from your existing compressed air source. Several models and sizes are available, along with a complete line of air supplied masks, hoods, hoses and accessories.

MODEL 50

It is a fact that isocyanate paints, hydrocarbons, oil vapors, carbon monoxide, and other toxic gases are extremely hazardous to your health. While working in contaminated air spaces, the use of a supplied-air respirator is mandated by OSHA [29CFR 1910.134 (d)(1)]. A NIOSH approved supplied-air respirator must be provided with Grade "D" Breathable Air. This used to mean purchasing additional pumps and/or running special duct work. Now, you can provide the highest level of respiratory protection, from your existing compressed air supply, serviced with a **Quality Air Breathing System** by **MARTECH SERVICES COMPANY**.
